REMARKS			

25X1

- Source observed Wiener Neustadt (O 48/33 TU:WN 9296) airfield on 30 April 1954 between 6:30 p.m. and 7 p.m.; on 1 May between 9 a.m. and 11 a.m., between 1 p.m. and 2 p.m., between 5 p.m. and 6 p.m.; on 2 May between 10 a.m. and noon, between 3 p.m. and 3:30 p.m. and between 6:30 p.m. and 7 p.m.; and on 3 May between 7:30 a.m. and 3 p.m. On all days [redacted] 25X1
2 Il-28s which were not covered with tarpaulins were parked at the same site. [redacted] 25X1

[redacted] The doors of the hangars at Theresienfeld were always open. No aircraft were observed parked outside of the hangar. No aircraft was observed or heard taking off from Wiener Neustadt airfield.

- Between 7:30 a.m. and 3 p.m. on 3 May, a total of 3 MiG-15s, 2 Il-28s, 1 high-wing monoplane and 2 biplanes were observed at Wiener Neustadt airfield. After 9 a.m., the degree of visibility changed from 0/10 to 10/10. It started raining, there was a medium degree of visibility and a northerly wind of about 10 km/h. No air activity was conducted. 25X1

- Vehicular traffic near the flight control station involved trucks [redacted] 25X1 and van-like truck [redacted] 25X1 all with drivers wearing black-bordered blue epaulets. The small cone-shaped antenna which reportedly had been observed in the depression near the pyrotechnic plant on 17 April was again removed. About 75 meters southwest of the small coneshaped antenna at the southern building of the flight control station, a similar antenna system was being erected on a mast, about 8 meters high.

[redacted] Comment. Wiener Neustadt airfield is still occupied by two Soviet fighter regiments. It appears possible that some MiG-15s of these regiments are, at present, stationed at Bad Voeslau airfield. The two Il-28s probably belong to the bomber units of the Fifty-Ninth Air Army stationed in Hungary. [redacted] 25X1
